

Jinze Li

Contact: (+86) 15326188839 | 241098166@smail.nju.edu.cn

Research Interests: Regional Coordinated Development, Urban Renewal, Industrial Spatial Organization, AI and Urban Economics

Education

Nanjing University, School of Business

Nanjing, China | Sep 2024 – Jun 2028

- **Degree:** Bachelor of Economics (Top Talent Honors Program)
- **GPA:** 4.488/5.0 (Last Semester)
- **Core Courses:** Intermediate Macroeconomics, Intermediate Microeconomics, Econometrics, Development Economics, Public Finance, Spatial Econometrics, Python Programming, Economic Geography, Big Data Economics

Research Experience

Principal Investigator, National Undergraduate Innovation Project, Nanjing University

Nov 2025 – Present

- Led full-cycle research on China's characteristic interest rate corridor optimization; Advisor: Prof. Pengfei Jia;
- Built 4-sector New Keynesian DSGE model with interest-bearing retail/wholesale CBDC as "soft floor", derived analytical solutions for 3 transmission channels;
- Constructed multi-period DID using 2015-2023 panel data of 364 prefecture-level cities; validated via Callaway-Sant'Anna estimator and 500-round placebo test. Identified 8.5% critical interest rate threshold and double-edged sword effect; found 1SD digital finance depth increases OMO transmission elasticity by 4pp, with 5-7x stronger effects in central/western China

Research Assistant, Distributed Solar in South Africa, University of Cambridge & LSE

Feb 2026 – Present

- Only undergraduate in the 5-member international team. Research team: Qingyu Chen, Yifan Wang and Weijian(Eddy) Zou;
- Resolved GEID mosaic georeferencing errors that blocked large-scale South African solar resource mapping. Built automated detection pipeline integrating PyTorch object detection, QGIS geospatial analysis and multi-threaded inference, achieving 10x speedup with CUDA acceleration;
- Implemented full evaluation module generating IoU metrics and error analysis; open-sourced production codebase: github.com/ljz060707-lang/RA.

Tweet Author, Xiangzhang Economic Academic Circle

Mar 2026 – Present

- Wrote frontier academic paper interpretations published on mainstream economic platforms, with top article reaching 1,000 reads and 100+ reposts.

Papers

Jinze Li, Administrative Market Clearing and Enterprise Capacity Utilization

- Took 2021 mandatory zombie firm exit pilot in 23 cities as quasi-natural experiment, evaluated causal effect of administrative market clearing on enterprise capacity utilization;
- Constructed 2017-2023 A-share listed firm panel, used PSM-DID as baseline, validated with Sun-Abraham weighting;
- Confirmed 0.57pp increase in treated firms' capacity utilization, uncovered one-source two-stream mechanism, and documented stronger effects in eastern regions, megacities and small cities.

Jinze Li, The Location Curse: FUA Integration and Industrial Hollowing in China

- Examined the causal effect of functional urban area (FUA) expansion on industrial development in satellite counties across 7 major Chinese city-regions, and verified the location resource curse hypothesis of metropolitan integration;
- Constructed a county-level panel dataset covering 2003-2024, adopted trend-adjusted continuous dose-response DID as baseline, and validated results with terrain-distance IV, entropy balancing and spatial regression discontinuity;
- Found that 1SD increase in FUA coverage reduces manufacturing output by 11%, uncovered three super-additive hollowing channels, and documented fundamental divergence between Beijing's administrative siphon and Shanghai's supply chain synergy.

Conference

- | | |
|--|---|
| • The 8th Young Researchers Forum of China Industrial Economics Society [Oral] | China Industrial Economics Society |
| • The 12th National University Economics Forum of Tsinghua University [Oral and Poster] | Tsinghua University |
| • The 12th Jingshi Scholars Forum and The 8th Academic Forum for Graduate Students in Economics and Management of Tsinghua University, Peking University and Renmin University of China [Oral] | Tsinghua University |
| • The 16th National Undergraduate Economics Conference of Universities [Oral] | Shanghai University of Finance and Economics |
| • The 5th Zhejiang University Forum on Future Cities [Oral] | Zhejiang University |
| • The 2026 Annual Conference of Anhui City Economic Society [Oral] | Anhui Urban Economic Association |
| • The 2025 National Economics Base Work Conference [Oral] | Ministry of Education |
| • The 4th Jiangsu Young Economic Scholars Forum [Oral] | Jiangsu Society for Social Sciences |

Leadership & Community

Founding President, Nanjing University Economics Association

- Established the first university-wide economics academic platform, officially recognized by the School of Business;
- Initiated long-term exchange cooperation with Jilin University, organized 15+ academic seminars and experience sharing sessions;
- Hosted the first Nanjing University-Jilin University Forum on the Development of Top-notch Economics Talents.

Founding President, The Social Practice Research Group of Nan Zhi Liao Xing

- Formed an 11-member interdisciplinary research team supervised by Prof. Wu Qiang; awarded school-level excellent project;
- Conducted field research on 6 manufacturing enterprises, 1 large SOE, 2 development zones and 1 research institute; currently collaborating with Muyuan Group on intelligent pig farm systems and interdisciplinary talent training models.

Core Team Member, China International Innovation Competition

- Led AI business model design for red cultural tourism digital platform, built AI agent system to transform cultural heritage into economic value;
- Secured 10+ cooperation letters and 3 million RMB investment intention from Chasi Group.

Honors & Awards

- | | |
|---|------|
| • Outstanding Communist Youth League Cadre of Nanjing University | 2026 |
| • Basic Discipline Scholarship (Excellence Award), Nanjing University | 2025 |
| • 1st&2nd Prize, "Yinxing Cup" Undergraduate Academic Paper Competition | 2025 |
| • Top 3%, 4th KPMG National ESG Case Analysis Competition | 2025 |
| • Excellent Social Practice Organizer, Nanjing University | 2025 |

Skills

- **Technical:** DSGE Modeling, Causal Inference (DID, IV, PSM), Spatial Econometrics, Machine Learning, Remote Sensing Image Processing
- **Software:** Python, Stata, ArcGIS, QGIS
